koha LMS

Powering Smarter Libraries, Building Stronger Learning Communities

Koha LMS is a comprehensive, open-source Library Management System trusted by libraries worldwide. It helps you organize, manage, and share your resources efficiently — all in one platform.

KEY CAPABILITIES

Cataloguing (MARC21, RDA, Z39.50)
Standard-compliant cataloguing for accurate and consistent records,

Circulation Management
Automate check-in, check-out, renewals, and fine management.

Modern OPAC / Discovery
Give your users a seamless search and discovery experience.

Patron & Membership Management
Manage patron accounts, privileges, and circulation history with ease.

Acquisition & Serials Management
Streamline your purchases and serials workflow.

Inventory & Stock Verification
Keep your collection accurate and up to date.

Reports & Library Analytics
Get valuable insights with customizable reports and statistics.

Multi-Branch Library Management
Manage multiple branches from a single system.

RFID & Barcode Integration
Enable faster, more efficient circulation and inventory control.

Digital Repository Integration
Preserve and provide access to your digital collections.

Cloud or On-Premise Deployment
Choose the setup that fits your infrastructure and needs.

Open APIs for Future Integrations
Connect with other systems and expand your possibilities.

WHY CHOOSE Koha LMS?

- Open Source & Cost-Effective
- Globally Trusted & Widely Used
- Flexible & Customizable
- Supports Digital Libraries
- Reliable & Secure
