Reality Defender's multi-model and multimodal deepfake detection platform helps enterprises and governments detect AI-generated content at scale.

OUR SERVICE

Multiple models concurrently detect AI generation and manipulation in audio, video, images, and text. Results are probabilistic, rather than deterministic, which means the models don't require watermarks or prior authentication to test for authenticity.

PURPOSE-BUILT SOLUTIONS FOR ESSENTIAL INDUSTRIES

LEADING DEEPPFAKE DETECTION

- **Proactive, Not Reactive**

Our Research team builds models based on the technologies used to create the dangerous deepfakes of today and tomorrow, keeping our platform several steps ahead of bad actors.

- **Always Ready**

The Reality Defender team continues to update, upgrade, improve, and iterate on our models, delivering industry-leading detection capabilities.

- **Effortlessly Scalable**

Whether you're scanning five files or five billion, Reality Defender can instantly scale to your organization's needs.
